OCT 5 - 1967

CURRENT SERIAL RECORDS

Data for this report are collected from public, private, and semiprivate warehouses, apple houses, and meat-packing plants where food products are generally stored for 30 days or more. Commodities in space owned or leased and operated by the armed services are not reported. All August 31, 1967 data are preliminary.

U. S. DEPARTMENT OF AGRICULTURE
STATISTICAL REPORTING SERVICE
Agricultural Estimates Division
Washington, D. C.
Cest 1 (9-67)

Commodity Summary

Refrigerated warehouse stocks totaled 6.1 billion pounds on September 1, up 121 million from a month earlier. Cooler-held products gained 46 million and totaled 1.6 billion pounds; freezer stocks, up 75 million, totaled 4.9 billion on September 1, according to the Crop Reporting Board.

A record August withdrawal of 13 million gallons brought frozen orange concentrate down to 68 million gallons on September 1. Year earlier stocks were 40

million, also average for the date.

Shell egg holdings were 327 thousand cases compared with 57 thousand on September 1, 1966 and the average of 256 thousand cases. The August net withdrawal of 64 thousand cases was average for the month but almost three times the August 1966 reduction. Frozen egg stocks were up 6 million pounds from a month earlier and totaled 99 million on September 1. These holdings were two-thirds larger than on September 1, 1966 but 9 percent below average.

The August gain of 116 million pounds in <u>frozen poultry</u> brought September 1 stocks to 484 million pounds, 71 percent more than last year and 81 percent more than average. Almost all of this gain was in turkey stocks which rose 104 million

to 325 million pounds.

Holdings of <u>meat</u>, other than poultry, declined to 526 million on September 1. Stocks of beef, <u>pork</u>, and other meat items declined during the month for a total reduction of 74 million pounds. September 1 stocks were 93 million pounds greater than last year and 60 million above average.

Frozen fruit stored on September 1 totaled 549 million pounds compared with 591 million a year earlier. The August gain of 43 million rounds was about two-

thirds of both the August 1966 rise and the average gain.

Frozen vegetable holdings were up to 1.4 billion pounds after an August rise of 135 million pounds. September 1 stocks were 11 percent above a year earlier and 26 percent above average.

Public Warehouse Occupancy

Public cooler occupancy was 61 percent on September 1, up 1 point from a month earlier. Cooler space use was higher than on August 1 except in the Middle Atlantic, West North Central, South Atlantic and South Central. At this time last year, 55 percent of the cooler capacity was used and the average is 58 percent.

Freezer occupancy was 77 percent, up 3 points from a month earlier. It was

66 percent at this time last year and the average is 71 percent.

Juices, Vegetables, and Fruits

September 1 stocks of <u>frozen orange</u> concentrate were down to 68 million gallons after a record August drop of 13 million gallons. Last year an 8-million gallon reduction brought September 1 stocks down to 40 million gallons.

Frozen vegetable holdings increased 135 million pounds during August and on September 1 amounted to 1.4 billion pounds. This gain was 20 percent less than average and 40 percent below a year earlier. Sizable gains were made in stocks of lima beans, snap beans, corn and peas. French fried potatoes were reduced 27 percent to 222 million pounds, 5 million less than on September 1, 1966 but 103 million more than average.

Holdings of frozen fruits were 549 million pounds after an August gain of 43 million pounds. Supplies were 7 percent less than a year earlier and 1 percent

below average.

Poultry and Poultry Products

An increase of 116 million pounds during August raised frozen poultry holdings to 484 million pounds. A year earlier, frozen poultry holdings totaled 283 million pounds and average is 268 million. The most significant August rise in poultry was in stocks of frozen turkeys. The increase was 104 million pounds compared with the

average August increase of 51 million. The 325 million pounds in storage on September 1 were more than double the average stocks of 160 million pounds. Holdings of other classes of poultry also increased during August.

Stocks of <u>frozen eggs</u> increased 6 million pounds to 99 million pounds on September 1. Usually holdings decrease about 2 million pounds during August. Shell egg holdings totaled 327 thousand cases compared with year earlier holdings of 57 thousand cases and the average stocks of 256 thousand.

Dairy Products

September 1 stocks of <u>butter</u> totaled 235 million pounds following an August increase of 6 million. Year <u>earlier</u> stocks were 86 million pounds and average is 299 million. Government-owned stocks accounted for 189 million pounds of the September 1 total.

American cheese stocks totaled 394 million, 2 percent less than a month earlier but 13 percent more than a year earlier. Average stocks are 405 million pounds.

Plastic cream increased 1 million pounds during August but fluid cream decreased 2 million pounds.

Meat and Meat Products

Total meat in storage on September 1 of 526 million pounds was 74 million less than a month earlier but 93 million more than a year earlier. Average September 1 meat stocks are 466 million. Total beef in storage was 250 million pounds compared with 216 million on September 1, 1966. Total pork stocks were 193 million pounds compared with 140 million a year earlier. Holdings of canned meats, lamb and mutton and veal also declined during August.
